

KEEP THOUSANDS OF PATIENTS OUT OF THE NATION'S HOSPITALS

Western Drug Merchant Discusses National Health

MONRAD J. OLSEN

of Des Moines, Ia., said, in an interview today, "If each person in this country would take an occasional laxative dose, our hospitals would lose thousands upon thousands of patients."

Mr. Olsen further stated that he was familiar with and had sold all the various laxatives, and that in his opinion, Rexall Orderlies is the most pleasant and sure remedy for constipation.

We have the exclusive selling rights for this great laxative. Trial size 10 cents.

DR. J. T. KINGSBURY RESIGNS AS HEAD OF UNIVERSITY

Salt Lake, Jan. 20.—The resignation of Joseph T. Kingsbury, president of the University of Utah, is in the hands of the board of regents. It will be accepted at a meeting of the board to be held tomorrow. At that time President John A. Widtsoe of the Utah Agricultural college will be elected to succeed Dr. Kingsbury as president of the state university.

While no official action has as yet been taken, it is reported that the board of regents agreed at an informal conference held recently to accept the resignation of President Kingsbury and to offer the place to Dr. Widtsoe of the Utah Agricultural college. It was rumored last night that Dr. Widtsoe had accepted the offer of the board and that he would be elected president of the state university tomorrow.

At Logan last night Dr. Widtsoe told inquirers that he had nothing to say whatever of the report.

The resignation of Dr. Kingsbury comes not altogether as a surprise. It was regarded as probable nearly a year ago when a number of the members of the faculty of the university resigned.

Removal Demanded.

At that time there was a demand on the part of members of the alumni and others that President Kingsbury be removed. However, during the bitter contest that ensued a majority of the board of regents stood with the president of the institution and he was retained, while the professors who left the institution sought places elsewhere.

However, the impression at that time appeared to be that when the trouble was over President Kingsbury would resign and a new head of the institution would be chosen. It is a coincidence that the new president of the university is a brother of O. J. P. Widtsoe, head of the English department at that position was one of the causes of the furore at the university nearly a year ago.

Dr. Kingsbury's resignation will probably take effect at the close of the school year. It is reported that Dr. Widtsoe is preparing to leave Logan at about that time, which would indicate that he is coming soon after completing the present term at the agricultural college to take up the work at the head of the university here.

Has Served Many Years.

Dr. Kingsbury will have completed twenty-one years of service as president of the university at the end of the present year. He was first elected president of the institution in 1897 and has been re-elected several times since. He was elected a year ago for a two-year term. Prior to his first election he served for two years as acting president. He now serves a connection with the university which he has maintained for thirty-eight years in various capacities.

President Kingsbury was born in East Weber, Utah, in 1853. He studied at Illinois Wesleyan, receiving at different times the degrees of bachelor of arts, master of arts and doctor of philosophy from that institution, and later the honorary degree of doctor of science from the University of Utah.

BRUTAL METHODS OF THE MEXICANS

How the Americans at Santa Ysabel Were Put to Death.

El Paso, Tex., Jan. 19.—A detailed report of the wounds found on the bodies of the victims of the massacre at Santa Ysabel, Chihuahua, January 10, was filed today with a representative of the state department.

The report was certified to by Dr. F. E. Miller of El Paso, who made examinations of each body, noting the ante-mortem and post-mortem wounds and causes of death.

The report shows the use of soft nosed bullets in inflicting death wounds, while mauler bullets were used to bring down the victims who attempted to escape. The bodies were stabbed with sabres or machettes, before and after death. They were examined just as they were recovered, some nude, others partially clad.

Alexander Hall had been empoiled on a bayonet as he stepped from the train, apparently, the knife entering the neck on the left side and penetrating upwards through the roof of the mouth to the base of the brain.

C. R. Watson was shot three times in the legs as he fled, scared on one arm and killed by a mauler bullet which passed through the chest. His body was then bayoneted through the right kidney.

J. P. Coy had been killed instantly by a bullet from ear to ear, and then stabbed on the right side of the neck. H. C. Hase was clubbed before a bullet through the head ended his torture.

J. W. Moon was bayoneted before and after death which had been caused by a bullet through the head from ear to ear. Half a dozen bullet wounds showed on his body, inflicted before and after death.

The body of W. D. Pearce was mutilated, his face being almost unrecognizable according to the report. The body was bayoneted repeatedly after death.

The head of W. J. Wallace, assistant to the general manager of the company, was beaten after he had been shattered by a soft-nosed bullet.

H. C. Hase was clubbed before a bullet through the head ended his torture.

The body of Richard MacFattion was riddled with bullets and before his suffering ended he was clubbed about the groin.

In the opinion of the physician, the head of A. F. Couch had been pressed down upon his chest, and a soft-nosed bullet sent tearing from above, down through his brain and chest, appearing later in bits of lead like bird shot under the surface of the skin on his chest.

T. M. Evans was hit in the chest by a small calibre bullet, stabbed in the face and mouth and left ear, and after he was dead, a machette was thrust into his right shoulder and turned around before being withdrawn.

George W. Newman was stabbed to death by a machette, probably wound two inches wide showing on the left side of his neck, where the weapon penetrated. Afterward his skull was crushed with a crowbar or run bar.

Death came to Thomas Johnson from the mauler entering the left ear after which he was stabbed in the right arm, back, left shoulder and from above and backwards, and on the right side of the neck. His skull was crushed by a blunt instrument.

M. B. Romero was shot twice by mauler bullets before a third entered his back, causing death. Afterward he was bayoneted and shot in the face with mauler and soft-nosed bullets.

Charles Wadeigh was shot through the head, bayoneted through the chest and then shot through the left temple and again through the body.

COMB SAGE TEA IN HAIR TO DARKEN IT

It's Grandmother's Recipe to keep her Locks Dark, Glossy, Thick.

The old-time mixture of Sage Tea and Sulphur for darkening gray, streaked and faded hair is grandmother's treatment, and folks are again using it to keep their hair a good, even color, which is quite sensible, as we are living in an age when a youthful appearance is of the greatest advantage.

Nowadays, though, we don't have the troublesome task of gathering the sage and the mussy mixing at home. All drug stores sell the ready-to-use product called "Wyeth's Sage and Sulphur Compound" for about 50 cents a bottle. It is very popular because no body can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time, by morning the gray hair disappears, but what delights the ladies with "Wyeth's Sage and Sulphur" is that, besides beautifully darkening the hair after a few applications, it also produces that soft lustre and appearance of abundance which is so attractive; besides, prevents dandruff, itching scalp and falling hair.—Advertisement.

TURKKS FLEEING BEFORE RUSSIANS

London, Jan. 19.—After only a slight pause since the conclusion of the "New Year's battle" on the eastern front, the Russians again have begun a strong offensive against the Austro-Hungarians on the Bessarabian frontier, east of Czernowitz, the capital of Bukovina.

Vienna had forecast that the second phase of the battle in this region was imminent by the announcement that the Russians were throwing strong reinforcements into east Galicia.

In the initial offensive of what probably will be termed the second

battle, the Russians launched with numerous columns four attacks near Toporoutz and Boyan, but, according to Vienna, they were everywhere repulsed.

The Germans have attacked Russian bases at Tarnopol, east Galicia, with an air squadron.

While the Turkish war office asserts that the Russians in the Caucasus have abandoned their offensive along the entire front for nearly 100 miles, owing to the reinforcements of the Ottomans and their assumption of a violent offensive, the latest Russian official communication describes the Turkish army in this region as having been disorganized and dislodged from a strong position extending over 66 miles, the Turkish retreat taking on the character of a panic-stricken flight. Several Turkish units, the communication adds, were almost annihilated, hundreds of bodies covering the field of battle.

Several attempts of the Austrians to approach Italian positions on the Tolmino sector and near Osavla were repulsed. Bombardments have prevailed elsewhere.

Another war council of the entente allies, attended by the British and French members, has been held in London.

Nothing is known of the council except that it was held for the discussion of plans for further prosecuting the war.

Great Britain has informed the United States through Ambassador Page that "innocent" mail taken from steamers by the British authorities is not being unnecessarily delayed, but forwarded to the addressees immediately. Mail and parcel post matter which is not classed as "innocent" is being held for the prize court.

WHAT DYSPEPTICS SHOULD EAT

Indigestion and practically all forms of stomach trouble, about nine times out of ten, are due to hyperacidity. Therefore stomach sufferers should, whenever possible, eat food that is acid in its nature, or which by chemical action in the stomach develops acidity. Unfortunately, such a rule eliminates most foods which are pleasant to the taste, as well as those which are rich in blood, flesh and nerve building properties. It is the reason why dyspeptics and stomach sufferers are usually thin, emaciated and lacking in that vital energy which only comes from a well fed body. For the benefit to those sufferers who have been obliged to exclude from their diet all starches, sweet fruits, and are trying to keep up a miserable existence on gluten products, it is suggested that you try a meal of any food or foods which you like, in moderate amount, taking immediately afterwards a teaspoonful of Bismarck's Magnesia in a little hot or cold water. This will neutralize any excess acid which may be present, or which may be formed, and instead of the usual feeling of uneasiness and fullness, you probably will find that your food agrees with you perfectly. There is nothing better than Bismarck's Magnesia as a food corrective and antacid. It has no direct action on the stomach, but by neutralizing the excess of the food contents, and thus removing the source of the acid irritation which inflames the delicate stomach lining, it does more than could be possibly done by any drug or medicine that acts upon the stomach lining rather than the stomach contents. Medicines of various kinds should be taken whenever necessary but there is no sense in dosing an inflamed and irritated stomach with drugs instead of getting rid of the acid—the cause of the trouble. Get a little Bismarck's Magnesia from your druggist, eat what you want at your next meal, take some of the Bismarck's Magnesia, as directed above, and see if this isn't the best advice you ever had on the subject of eating.—Advertisement.

BALTIC STUMBLING BLOCK TO BRITAIN'S BLOCKADE

London, Jan. 19, 3:44 p. m.—From views obtained in official circles, it is known that the chief obstacle in the way of substituting an actual blockade of Germany for the situation created under the orders-in-council is provided by the Baltic.

The problem of controlling the Baltic, so that the precedents established during the American civil war may be met, is giving the government considerable trouble and on its solution depends the decision of the cabinet as to the cancelling of the orders-in-council.

FRENCH STEAMER SUNK.

London, Jan. 19, 5 p. m.—The French steamer Leoville of 755 tons has been sunk. The captain and fourteen survivors have been landed.

VILLA'S CHIEF DISAPPEARS.

El Paso, Tex., Jan. 19.—Manuel Medina, who was Villa's chief of staff, and who was placed in jail at El Paso during the riotous demonstrations against Mexicans here last week, apparently has disappeared since being deported to Mexico, two days ago.

AMERICANS MURDERED IN COLD BLOOD BY MEXICAN BANDITS

The above photograph, taken at the Cusihiuachic mines in Mexico, shows nine of seventeen Americans dragged from a train and slain by bandits near Santa Ysabel early last week. The picture is the property of Charles Tru, Jr., of Chicago, chief auditor of the mining company. At the extreme left is shown Charles R. Watson, general manager of the mines, a former Chicagoan. He was described by Colonel Sanborn of the First infantry as "ten wildcats in one."

IMMORALITY IN ILLINOIS HOMES

White Slave Investigation Includes the "Call Girl" and Domestic Servants.

Springfield, Ill., Jan. 19.—Poverty is the principal cause of immorality, the minimum wage for girls and women is fixed at \$8 a week and unregulated conditions of domestic employment, render the home, in many cases, breeding places of commercialized vice, according to the Illinois senate white slave investigation committee's report, made public tonight when formally presented to the state department.

Industrial oppression of the helpless is declared by the report, to be directly responsible for a large part of existing immorality. Thousands of girls, it says, are driven into prostitution "because of the sheer inability to keep body and soul together on the low wages received by them."

The system of domestic employment in America is condemned in positive terms. "Unregulated conditions of domestic employment, uncertain hours, absence of definite social status and lack of creative opportunities render the home, in many cases, for the woman servants, a breeding place of immorality," says the commission's report.

Investigations conducted by the committee, the report says, disclosed the fact that more women of the underworld fall into dishonor from domestic employment than from any other work. Of 181 girls sent to the state training school at Geneva, Ill., who had worked for a wage previous to commitment, the committee found that 115, or 63.55 per cent, were engaged in domestic service. "It is a peculiar complaint to the sensibility of the female," says the report, "and her intuitive avoidance of sexual danger, that the occupation proved by actual statistics to be productive of most prostitution is the occupation she most shuns."

Eight dollars a week is fixed by the committee as the least amount that will meet the necessary items of a bare living for a girl employed in a large city. The report says wages were discouragingly short of this figure.

A condition of which the report declares strikes directly at the home, is found in what is termed the "call girl" system. On this subject the report says, in part: "A detective told of a 'call' list which he had seized in a raid. More than 20 names were on the list; first names only being given, then opposite the telephone numbers. He checked up the names and numbers. Some of the women were respectable married women. Two were young daughters. Others were working girls. The case of a young mother serving as 'call girl' and using the money she made in buying necessities for her baby, is merely illustrative of the character of some of the women in this system."

High-Class Cafes.

High-class cafes are hard hit in the report. The conspicuous place of intoxicants in the undoing of many girls, is dismissed as a matter of such general knowledge as to require no elaboration. The report says there can be no disagreement as to the effects on the young women with alternate drinking and dancing as practiced in many fashionable restaurants. "The free and easy manner of introductions adds to the danger. Most of the girls who frequent the popular restaurants given over to dancing are very young."

As a result of its investigation the committee recommends:

- 1.—Enactment of a minimum wage law.
- 2.—Repeal of the social laws fallen into disuse and strict enforcement of all others.
- 3.—Encouragement of uniform state social legislation.
- 4.—Improvement of conditions for girls in domestic service.
- 5.—Establishment of homes for moral and industrial schooling of reformed women.
- 6.—Extension of vocational education.
- 7.—Abolition of the "fining" system in the treatment of immoral women.
- 8.—Registration of minor boys and girls in employment.
- 9.—Prohibition of printing in newspapers of details of court cases involving moral lapses.
- 10.—Creation of a state athletic commission for the encouragement of healthful pastime.

commission for the encouragement of healthful pastime.

The report concludes an investigation that began in August, 1913, and covered extensive inquiries into conditions existing in Chicago, Springfield, Peoria, Alton, East St. Louis and several other Illinois cities.

GERMAN PRISONERS OF WAR CAPTURED

Calais, Me., Jan. 19.—A situation of international interest developed today when four men, alleged to be German prisoners of war who had escaped from a detention camp at Amherst, N. S., were captured on the American side of the border. They had crossed the ice on the St. Croix river two miles above this city from the New Brunswick shore. Three of the men had fled to Ayer Junction, where they were about to board a westbound train, when H. C. Gillis, a United States immigration inspector, arrested them. Another was caught here.

Agents of the Canadian government in this city said formal proceedings would be started at once through the administration at Ottawa and the British ambassador at Washington, seeking the return of the alleged fugitives to Canadian soil.

The men apprehended here gave their names as William Schroeder, Gustave Hartwig, George Kleinworth and Hans Neu.

The escape from the camp at Amherst was effected by tunneling 150 feet under walls to a point beyond the sentry lines.

DRUGS EXCITE YOUR KIDNEYS. USE SALTS

If your Back hurts or Bladder bothers, drink lots of water.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drinks lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder how became of your kidney trouble and backache.—Advertisement.

HEAD OF PRINCETON IS IN FAVOR OF U. S. PREPAREDNESS

Salt Lake, Jan. 20.—"I am a pacifist but a pacifist who believes in some kind of preparedness for war, but preparedness against war," declared Dr. John Grier Hibben, president of Princeton university in a stirring appeal for "Military Preparedness" to the members of the Bonnevill club at a dinner in the Hotel Utah last evening. Speaking with the authority that comes from thorough study and wide investigation, Dr. Hibben discussed the theme of the hour with a quiet vigor and sincerity that placed him in first rank among the

Mexico's Natural Resources

NOT all residents of the United States are aware of the enormous commercial and industrial enterprises of the Mexican Republic.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, it causes a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.
